

**Title:** Research Scientist; **IBM Social Good Fellow**

**Duty Location:** Yorktown Heights, NY

**Job Summary**

The IBM Social Good Fellowship is an opportunity for graduate students and postdoctoral scholars to develop their skills and develop data science solutions that benefit humanity.

Mentored by leading IBM Research scientists and engineers at the T. J. Watson Research Center in Yorktown Heights, NY (north of New York City), fellows use data mining, machine learning, analytics, operations research, statistics, and mobile computing methods to complete projects with social impact.

Working closely with non-governmental organizations, social enterprises, government agencies, and other mission-driven partners, fellows take on real-world problems in health, energy, environment, education, international development, equality, justice, and more. More info on:
